True Cost

Wireless Energy Metering Analyzer

TrueCost is a wireless energy consumption analyzer (US@2001 Patent) that connects directly to your main electrical system (DIN standard) in your home or office. TrueCost measures real-time electrial energy consumption on each phase, which can be displayed on your PC or smartphone application.

- Smallest device - two DIN slot

- Protect your appliances with TrueCost by measuring the network voltage and get alert if it is too High/Low

- Set a monthly budget and receive an alert when the budget has been excceded

- Discover appliances that are heavy energy consumers and optimize their usage

- Support up to 512 TrueCost users

- Solving a lack of connectivity with 4G LTE router that includes WiFi enables installing TrueCost in sites where no WiFi is available

- Shout down unnecessary appliances and save money

- Interface with a smart home system and control it with TrueCost

- One year electricity data storage

- Vehicle charging monitor with SMS alert when battery is full

- TrueCost sends generator fault's SMS, includes active/inactive status

- TrueCost measures the solar panel efficiency. Get alert when energy production is below pre user-defined percentages.
